

Fume Hoods

Our versatile fume hoods are used in a variety of laboratory and production applications. Resistance to the strongest acids, bases, and solvents is outstanding. All instrumentation is at eye level for easy viewing and servicing. A clear shield protects operator's eyes while allowing access to the work area. The exhaust system removes dangerous fumes, meeting OSHA requirements.

General Considerations / Options:

Overall unit width: 4, 6, 8, 10 ft.

Material: Polypropylene, PVC, stainless steel, rolled steel

Tanks and baths

Sinks and faucets

Cabinetry

Gas guns
